

Date: 4/??/16

Wednesday Challenge Form

Group Members: Alvin, Other people

Problem Statement: After watching a video of people skydiving, predict how fast the people were falling from 12,500 feet to 5000 feet.

Approach: We used the equation $\text{rate} = \text{time} * \text{distance}$ to find our answer.

Solution: We were really close, but someone who knew the answer already won. :p

Lessons Learned: MATH
